Teck Donates \$500,000 to UNICEF Canada to Support COVID-19 Response in India

Vancouver, B.C. – Teck Resources Limited (TSX: TECK.A and TECK.B, NYSE: TECK) (“Teck”) today announced a \$500,000 contribution to UNICEF Canada in support of life-saving COVID-19 response efforts in India.

“Our donation to UNICEF Canada will go towards the immediate life-saving response as well as long-term hospital infrastructure in the most impacted areas of India,” said Don Lindsay, President and CEO, Teck. “COVID-19 is taking a terrible toll on the people of India and our hearts go out to them. This funding will go towards urgent healthcare requirements and help support those most in need during this incredibly challenging time.”

“We are grateful to Teck for taking immediate action to meet the most pressing needs of families in India. With the COVID-19 case count rising by the minute in India, UNICEF is racing to avert further tragic loss of life and to protect children’s futures,” said David Morley, President & CEO of UNICEF Canada. “Teck’s generous contribution will enable us to increase access to life-saving oxygen in India while also helping to provide the infrastructure to allow medical facilities across the country be better equipped to treat patients for years to come.”

The funding will be directed by UNICEF Canada for support initiatives in India including procurement of:

Increasing access to life-saving oxygen: A new on-site Oxygen Generation Plant (OGP) can provide enough oxygen for a 500 bed hospital. Hospitals treating severe/critical cases will be prioritized – but with a lifespan of 20 years, each OGP unit will continue to save lives of ill patients for years to come, including neonatal and obstetric care, surgery and intensive care.

Boosting testing capacity: By procuring additional RT-PCR machines UNICEF will help boost test processing capacity in some of the worst affected districts. Lasting up to 10 years, each new testing unit will not only speed up identification and treatment of COVID-19 infections, but provide a legacy for testing for other deadly diseases such as TB, HIV, HPV and streptococcus, when COVID-19 declines.

UNICEF Canada support will focus on the most affected regions of India.

This donation is part of Teck’s \$20 million COVID-19 Response Fund, supporting critical social initiatives and increased healthcare capacity in the communities in which Teck operates and globally. Through the fund, Teck has also made a \$1 million contribution to UNICEF Canada in support of the Access to

COVID-19 Tools (ACT) Accelerator, a global partnership dedicated to the equitable distribution of vaccines, treatment and testing for COVID-19. Teck further donated \$500,000 to UNICEF (in collaboration with the World Health Organization Solidarity Response Fund) to provide critical medical and sanitation supplies, equipment and training in over 180 countries. About UNICEF

UNICEF is the world's leading humanitarian organization focused on children. We work in the most challenging areas to provide protection, healthcare and immunizations, education, safe water and sanitation and nutrition. As part of the United Nations, our unrivaled reach spans more than 190 countries and territories, ensuring we are on the ground to help the most disadvantaged children. While part of the UN system, UNICEF relies entirely on voluntary donations to finance our life-saving work.
