## **Section 1 - Conflict Minerals Disclosure**

### **Item 1.01 Conflict Minerals Disclosures**

Teck Resources Limited (together with its wholly-owned subsidiaries, “**Teck**”) has determined that a conflict mineral, tin, was necessary to the functionality or production of a number of products manufactured by one or more of its wholly-owned subsidiaries in 2014.

The tin included in all of the relevant products, except one, was sourced from a single secondary tin smelter through an agent. That secondary smelter appears on the conflict-free tin smelter list produced and maintained by the Electronic Industry Citizenship Coalition and Global Sustainability Initiative Conflict-Free Smelter Program. The conflict-free smelter list includes entities that are compliant with the Conflict Free Smelter Program assessment protocols and that have been subject to an independent third party audit to assess whether the entity employed policies, practices and procedures to source conflict free minerals. The smelter was the sole source of tin to Teck for these products in 2013 as well, prior to its inclusion on the conflict-free smelter list. For tin supplied in 2013, Teck had received confirmation from the smelter that the tin supplied to Teck came from recycled or scrap sources, as defined in paragraph (d)(6) of Item 1.01 of Form SD.

For one product, tin removal salt, tin is sourced from recycled materials processed at our Trail operation, zinc and lead concentrates purchased from miners and concentrate traders by our Trail operation, as well as lead and silver bullion acquired from a secondary smelter. We view tin as an impurity in the concentrates and bullion that we purchase and production of tin removal salt is a necessary process to remove these tin impurities. In each of the purchase agreements entered into for product received in 2014, the seller has confirmed in the relevant supply contract that no part of the concentrate supplied under the agreement was sourced from the Democratic Republic of the Congo or an adjoining country. With respect to concentrate purchased directly from miners, concentrate is sourced from a mine operated by the relevant miner. We also reviewed the purchases of concentrate made from miners in 2014 and determined that none of our concentrate purchase agreements in 2014 specified that the source of the concentrate was a mine located in the Democratic Republic of the Congo or an adjoining country. With respect to bullion, we received confirmation that none of the products supplied to us in 2014 were sourced from the Democratic Republic of the Congo or an adjoining country.

Based on the responses to our requests for confirmation, the review of the conflict-free smelter list, as well as our purchasing arrangements with miners and our understanding of the locations that the concentrate traders and miners source concentrate from, Teck has determined that the necessary tin for tin removal salt in 2014 did not originate in, or that it has no reason to believe that such necessary tin may have originated in, the Democratic Republic of the Congo or an adjoining country

This information is publicly available in the Financial Reporting section of Teck’s website at [www.teck.com](http://www.teck.com).

## **Section 2 – Exhibits**

### **Item 2.01 Exhibits**

None.
