Concentrator

Grinding lines and
rougher flotation cells –
lowering shell for ball
mill #4

April 2021

Concentrator

Lowering first shell for
ball mill #3
(5 of 6 mills now installed)

February 2021

Concentrator

Structural steel for
grinding building

April 2021

Concentrator

Installation of SFR
cells in flotation circuit

March 2021

Concentrator

Assembly of 43m
diameter bulk and
copper concentrate
thickeners

March 2021

Concentrator

Underflow and wall construction of 85m diameter tailings thickeners

February 2021

Crushing and Conveying

Structural steel for ore
stockpile stacker

March 2021

Crushing and Conveying

Installation of bottom
shell for primary
crusher

February 2021

Crushing and Conveying

Overland conveyor foundations from crusher to ore stockpile

March 2021

Tailings Management Facility

Starter dam and foundation abutments being performed by Teck mine fleet

March 2021

Pipeline

Lowering of the make-up water system

March 2021

Pipeline

Pump setting at pump
station #3
(all 25 pumps now installed)

April 2021

Port Offshore

Pile driving from two work fronts for jetty

March 2021

Port Onshore

Filter plant structural
steel advancing and
2/3 tanks installed

February 2021

Desalination Plant

Pre-treatment and
Reverse Osmosis
facilities

March 2021

Infrastructure - Substations

Incoming 220kV
transition tower

February 2021
